Linda, FYI...not sure exactly what kind of "technical documents" this guy will want. Should I just tell him to call you, then you can decide if it's something that we can easily accomodate, or if it is better to go through the FOIA process? I'll send him the SE Idaho Updates.

By the way, I heard you are officially taking over the Superfund piece as well. Maybe we can chat again in the next couple of weeks. I think it would be nice to put out another Update soon to give people an idea where we are headed (even if we don't entirely know ourselves yet)...

Hi Bert; thanks for the e-mail.

Would you please put me on the mailing list for the Southeast Idaho Update and send me copies of the August and October newsletters? My mailing address is at the bottom of this e-mail. I'd also like to receive technical documents as they become available; I'm not sure what the best way to do this - a periodic FOIA request possibly. If you have any information on the best way to obtain copies of project documents, please let me know, otherwise I'll plan to call Linda Meyer in a week or two to follow up.

Thanks very much for your help.

Andy, as Misha mentioned in her e-mail, I am now the public involvement coordinator for all things Pocatello/Fort Hall. I apologize for the

outdated information on our website. We periodically send out a newsletter called Southeast Idaho Update that includes information about EPA projects/actions/comment periods/etc. regarding FMC and other sites in the area. I'd be happy to include your name on the mailing list, or anyone else interested in receiving these updates directly. We recently issued newsletters in August and October, both with information about EPA's current RCRA activities at FMC. Let me know if you'd like a copy of those as well. We currently have an open comment period related to the closure and capping of waste ponds 17 and 18 at FMC. That comment period ends Friday, Nov. 16.

Our EPA project managers for RCRA-related work at FMC are Linda Meyer (for permitting issues, 206-553-6636, meyer.linda@epa.gov) and Sylvia Burges (for compliance issues, 206-553-1254, burges.sylvia@epa.gov). Feel free to give one of them a call if you have specific questions.

Thanks - Charles

Bert)

Hi:

Charles Bert has taken over the community relations associated with environmental issues in SE Idaho. He can be reached at (206) 553-0225. I know that there had been/are a number of Simplot representatives on the mailing list; however, it is worth checking the current mailing addresses as well as the contact names to ensure the mail/other notices are arriving where it should.

Hope this helps.

PM

Misha;

I am a consultant that has represented the J.R. Simplot Company on the Eastern Michaud Flats Superfund project for a number of years. Recently they asked me to make sure that they were on the notification list for any public information associated with RCRA issues at the FMC facility.

They

are primarily interested in participating in any public comments on groundwater issues at the FMC facility. My search of EPA's web site indicated that you were the point of contact for the RCRA project, but the phone number given was out of date; hence the e-mail.

If you could let me know how I can get onto the public notification list I would be very grateful. Also, what is the best way to receive data from FMC's on-going RCRA groundwater monitoring program? If you are no longer the point of contact, could you tell me who is?

Thanks in advance.
